

Quick & Efficient Auto-Check System (ID/ Body Temperature/ Mask Detection)

Common Pain Points for Factories

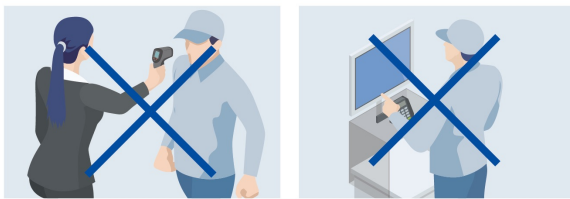

- Temperature-taking at entrance requires manpower and is time-consuming.
- Thermometer can only take temperature, not employee's identification.
- Manual method such as using Excel file is tedious and prone to human error.

Facial Recognition & Temperature Monitoring (Paperless)

SATO SmileOkay-HT + @Form

- ✓ **After ID check by facial recognition, the system will take body temperature and check if employee is wearing a mask.**

You can keep your mask on! The system recognizes you and logs your temperature.

- ✓ **Quick and accurate scanning with mask detection**

ID registration **10** sec Recognition **0.2** sec Recognition Accuracy **99** %

※ The result may vary depending on the environment, operation and conditions.

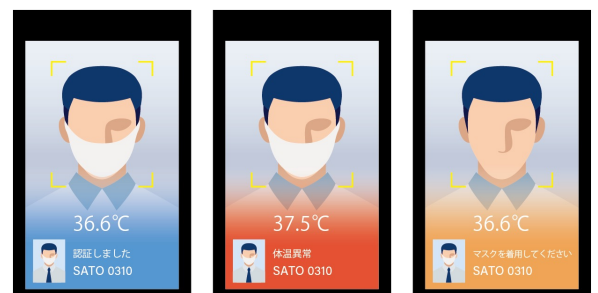

- ✓ **Integration with Cloud Platform** *Paperless

- Centrally manage data by web-based cloud platform
- Visibility from anywhere
- Record data both at office and Work-from-Home (WFH)

- ✓ **Integrate with Attendance Management System and Visitor Tracking System for further operational efficiency**

※ Please enquire with SATO sales department.

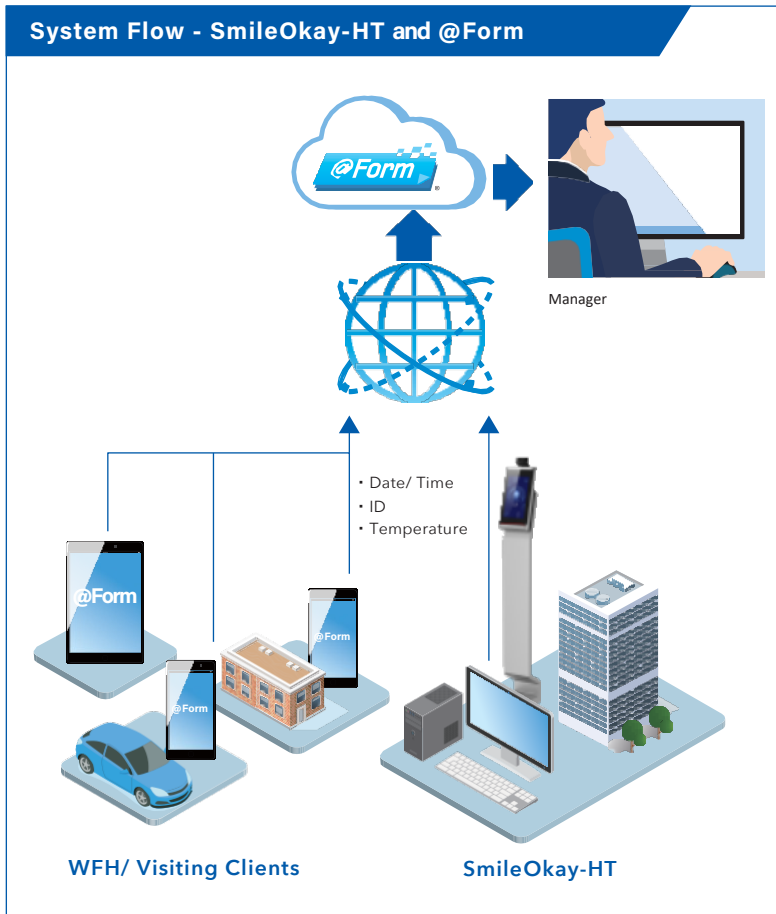

Quick facial recognition system checks for ID, body temperature, and mask.

* This is not a medical device. It only checks body surface temperature.

Cloud Management (Paperless)

System Flow - SmileOkay-HT and @Form

✓ Easy Registration/ Uploading

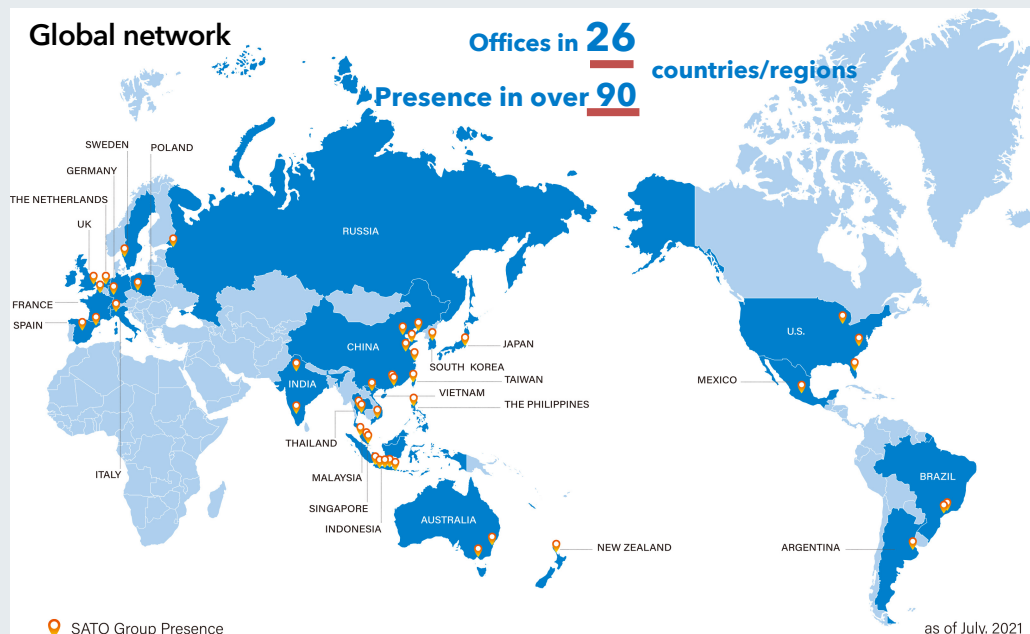

SmileOkay-HT uploads data to cloud /server and there is no action required to report. @Form is accessible from personal mobile phones and tablets which enables employees to register even while working from home. The system reduces mistakes made by manual entry and lack of update.

✓ Real-time Data Visibility

Managers can refer to the uploaded data in real-time. The system gives an alert when abnormally high temperature is recorded and provides instructions for next action. With this feature, managers can take safety measures swiftly.
