RFID Consumables Scan / Click

Please note:

- For a single license of this software, you may install to only one computer to which the database is installed.
- Use of handy terminals requires wireless connection.
- Up to 100,000 items can be registered in the master file.
- RFID products contain sensitive semiconductor chips that may cause their read performance to vary substantially depending on the environment where they are used.
- Field testing for RFID solutions is required in the customer's actual operating environment prior to implementation.
- As RFID solutions are built based on field testing, any subsequent changes to tagging positions and other conditions may affect their intended performance.

System requirements

Web server	
OS	Windows Server 2016 or higher, Windows10
CPU	Core i5 or higher (recommended)
Memory	Server OS: 16 GB or more recommended, Windows10: 8 GB or more
HDD	Minimum 30 GB of free disk space required *Depends on data volume and number of client PCs/devices.
Database	SQL Server 2019 Express Edition

Client (for browsing database)		Client (to control reader/gate)	
Browser	Google Chrome Microsoft Edge	OS	Windows10
Browser specs to run the above browsers		CPU	Core i5 or higher (recommended)
		Memory	8 GB or more
		HDD	Minimum 2 GB memory required

Manage your tools & returnable items inventory
with **RFID**

RFID Asset Management System

ASET_{RA}

Video
Scan / Click

Is your asset management:

- Taking too much time to log items by hand?
Prone to errors in entering information?
- Taking time reading barcodes?
- Unable to track loan-outs/returns?
- Unable to renew because of the time and cost?

RFID Asset management system

ASETARA
solves your problems

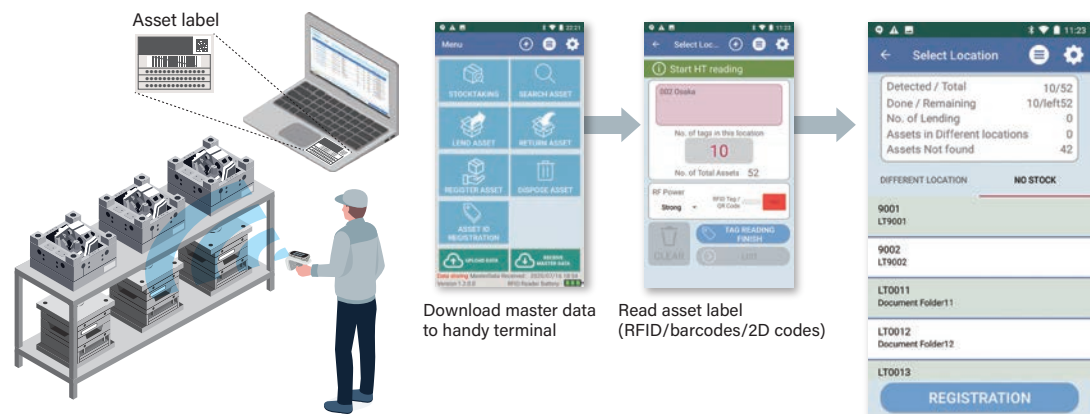

Customer voices

- ✓ Thanks to faster stocktaking, we **now stocktake every month** as opposed to several times a year. This has **improved accuracy**, while reducing downtime from lack of spare parts.
- ✓ **Stocktaking now takes 1/20** of the time it took before with barcodes.
- ✓ We can **track loan-outs and returns on our database**, which solves problems more quickly.
- ✓ System was **installed easily and quickly**.

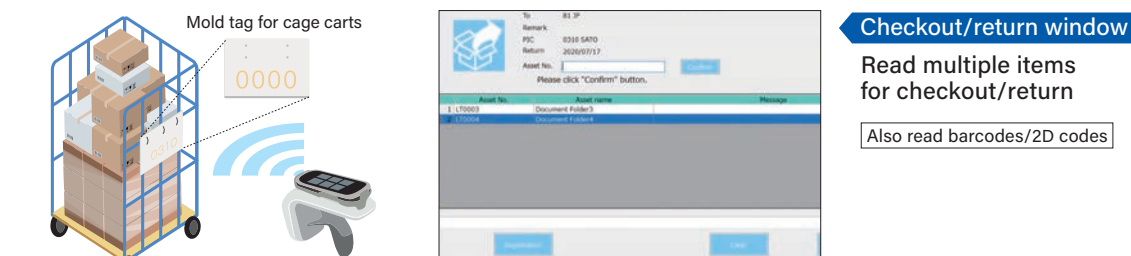

Stocktake, track and search your assets with one system

Advantages

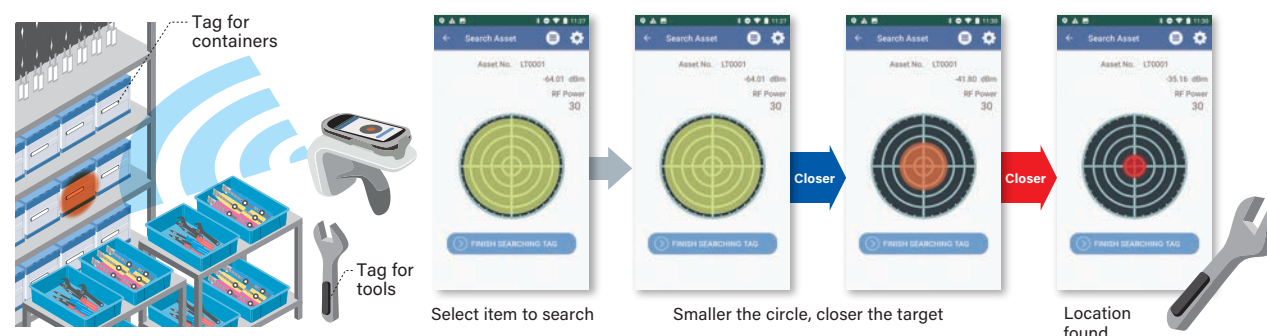

1. Stocktake ... Read multiple RFID tags/labels at once and save time

2. Track Loan-outs/Returns ... Automate checkouts for greater efficiency and accuracy

3. Search ... Search items/tools efficiently

Assets window

Set three location categories for efficiency
(e.g., Cat. 1: Tokyo factory, Cat. 2: Building A, Cat. 3: Warehouse B)

- Purchase date
- Asset age

✓ Installs easily without special knowledge

- Assigns ID (RFID info) to customer's current asset numbers
- Offers a variety of label templates

✓ Reads RFID and barcodes/2D codes

- Can stocktake and search using either RFID or barcode by switching settings on handy terminal

✓ Works with existing asset management database to reduce system development cost

- Uses CSV file format for high compatibility with core IT systems
- User can switch from handwriting logs to using CSV and improving work efficiency

✓ Pairs with the most ideal reader for your operations

- Offers a selection of readers that work for every type of asset
- RFID security gate (to prevent unauthorized carry-out)

✓ Offers accuracy in managing loan-outs

- Allows reservations
- Sends email notifications (e.g., when return is late)
