

For CT4-LX, CT4-LX-HC

## Intuitive Printer Display Solution

### Common challenges

- Tedious printer operations take clinical staff's time away from patient care.
- Clinical staff may unintentionally modify printer settings, causing errors that must be fixed by the IT department.
- Managing the printer fleet, as well as its settings, is a hassle for the IT department.

### ✓ Necessary info at a glance

Streamline and enhance printer operations by configuring the printer to display only the information that is relevant to the clinical staff, such as tutorial videos, helpdesk information and essential settings.

### ✓ Better UI with shortcut buttons

Shortcut buttons at the bottom of the screen enable quick access to frequently used functions, helpdesk information and tutorial videos for troubleshooting. The user-friendly display enhances intuitive operation and prevents unintended tampering of settings.

### ✓ Easily customizable

Hospital IT staff or their business partner can easily customize the screen to their preferences without additional programming.

## Benefits for administrators

### Customizable screen

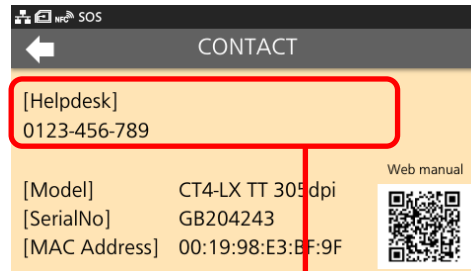

Home screen

Customizable

Insert logo or image

Helpdesk contact

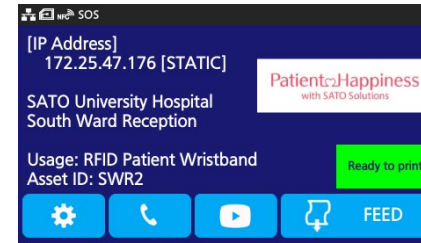

Customizable

Configure settings based on the organization's needs and printer environment. A logo or image can be inserted to show what the printer is for, or simply for branding purposes.

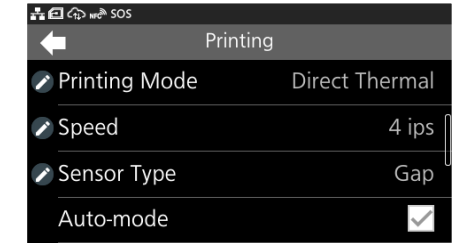

### User access control

Clinical staff screen

Clinical staff cannot see printer settings

IT department screen

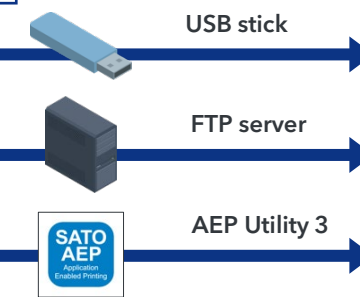

Only IT department can access printer settings

Clinical staff are unable to modify printer settings. The IT department no longer needs to take time fixing settings accidentally changed.

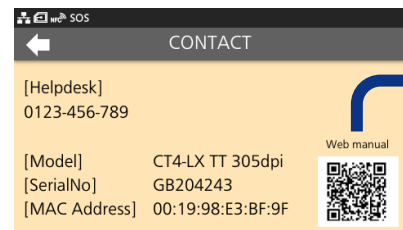

### Easy updating

### Accessible manuals

Link to web manuals

Link to tutorial videos

Guidance video shows step-by-step label loading procedure

Clinical staff can access web manuals and tutorial videos, mitigating the need to contact helpdesk and reducing downtime.

#### Enhance labeling productivity and accuracy while reducing costs

SATO AEP (Application Enabled Printing) allows for tailor-made labeling applications for purposes such as PC-less printing and direct connection of peripherals such as keyboards, scanners and scales.

Screen content such as messages and images can be imported easily as CSV files without additional programming.
